

# CakePHP アソシエーション belongsTo と hasMany の関係

2010年7月12日

```
class Post extends AppModel{
    var $belongsTo = array( 'Blog' => array(
        'className' => 'Blog',
        'foreignKey' => 'blog_id',
    ));
};
```

```
findAllの結果
array(
    [0] => array(
        [Post] => array(
            [id] => 1
            [blog_id] => 1
            [post_title] => 百合の花の咲かせ方
        )
        [Blog] => array(
            [id] => 1
            [blog_title] => 花ブログ
        )
    )
    [1] => array(
        [Post] => array(
            [id] => 2
            [blog_id] => 3
            [post_title] => DOHCに付いて
        )
        [Blog] => array(
            [id] => 3
            [blog_title] => 車ブログ
        )
    )
    [2] => array(
        [Post] => array(
            [id] => 3
            [blog_id] => 1
            [post_title] => 桜の生長
        )
        [Blog] => array(
            [id] => 1
